# CS 202: Lab Expectations
## Spring 2018

I, _____ have read and understand the CS202 Expectations
(printed full name)                              in the CS202 Lab Manual for **Spring 2018**.

**I understand each of the following requirements for the class:**
1. I understand that I must be actively working the entire time for attendance to count.
2. I will do my best to use the lab time to further my knowledge of the material, participating in the group activities, designing test plans, and programming in the lab manual.
3. The group activities are graded as part of the lab manual requirements; they are not optional!
4. I will attend the lab section that I am enrolled in. I understand that if I attend any other lab, I need to request permission by my lecture Professor, or Instructor.
5. I will attempt to arrive within the first 5 minutes and stay for the entire session.
6. I understand that my PSU ID is used to scan-in and out of labs each time.
7. I will always come with **both of my lab manuals: the Linux & Vim manual and the CS202 Lab Manual**. I know that I can't attend without the manuals; there will be exercises from both manuals in the labs. The CS202 Lab manual must be specifically for **Spring 2018**.
8. I understand that starting with Lab #2, prelab exercises are required to attend the lab.
9. I will work hard to complete the lab materials; I know that I can schedule to attend another session to continue working on a lab if I think that would be beneficial for me. I will perform **group activities** that accompany the labs during each session.
10. If I haven't done the linux & vim exercises from CS162 and CS163 at PSU, then I will start with the level #1 and level #2 exercises and complete them before performing the level #3 exercises. I should complete all level #1-3 exercises this term!
11. I understand that there are 10 lab sessions this term and I can only miss one.
12. I also understand that if I miss a lab session, I need to make it up within a two week period. The official makeup lab is on Wednesday at Noon; I must make an appointment to attend. I can't make up labs whenever I want. If I end up needing to make up more than two labs, I will need to contact my Instructor to develop a plan on how to proceed.
13. I agree to let the technical assistants make notations in the lab manual and corrections to the prelab exercises for each lab that I attend.
14. I agree to ask for assistance if I don't understand a concept. I am aware that I can meet with my Professor or Instructor to receive further assistance.
15. I am aware that food and drink are not allowed in the lab classroom, except in designated areas as controlled by the lab facilitator. Some lab facilitators may allow sealed containers.
16. **I won't use my cell phone during the lab or my computer for non-lab related work. I will excuse myself if I need to handle a personal matter.**
17. I understand that the only websites allowed during the lab are D2L and cs.pdx.edu/~karlaf
18. I agree to be sensitive to the students around me in lab. I should limit the volume of discussion and keep it related to the course material.

**I certify that I have read and understand the course requirements as discussed above.**
